Summary

Developer skilled in MERN stack, Java, and Python with strong problem-solving abilities proven by solving 600+ LeetCode problems. Experienced in building full-stack projects and applying technical expertise during an internship at Indian Oil Corporation Limited using agile practices and Git-based version control.

Skills

Programming : C, Java, Python, JavaScript, Object-Oriented Programming (OOP), C++

Web Technologies: HTML, CSS, Tailwind CSS, Bootstrap, RESTful APIs, JavaScript (ES6+)

Frameworks/Libraries : React.js, Node.js, Express.js, Git

Databases : MongoDB, SQL, NoSQL

Core Concepts : Data Structures, Algorithms, Backend Development, Debugging, Performance Optimization

Projects

Notebook | *MongoDB, Express.js, React.js, Node.js*

May 2024 – Jul 2024

- Created a full-stack notes application where users can **create, update, and delete** personal notes securely with authentication.
- Implemented protected routes, RESTful APIs, and session handling on **Node.js/Express** with a responsive **React** UI and persistent storage in **MongoDB**.
- Actively used by **20+ students and peers**, improving accessibility and reducing manual effort by **60%**.

AI Diet Tracker | *MERN Stack, LLM Model*

Dec 2024 – Jan 2025

- Developed a diet tracking web app using **MERN stack** integrated with an **LLM model** for nutritional insights and **data analysis**.
- Built APIs for automated calorie calculation and optimized database queries for faster response times.
- Actively used by **15+ users** to track meals, demonstrating backend efficiency and scalability.

AI-Powered Face Detection Attendance System | *Python, OpenCV, Streamlit*

Sept 2024 – Nov 2024

- Built an AI-based attendance system leveraging **OpenCV** for real-time facial recognition and automated attendance marking.
- Reduced manual tracking by **80%** through accurate face detection and backend data storage in CSV/Excel.
- Demonstrated skills in **testing, debugging, and optimization** for reliable system performance.

Experience

Front-end Intern

June 2023 – August 2023

Indian Oil Corporation Limited (IOCL)

Tools Used: React.js, Tailwind CSS, Figma, Git

- Collaborated with cross-functional teams in **agile sprints**, focusing on **frontend design, integration, and testing**.
- Built and optimized responsive UI components using React.js and Tailwind CSS, enhancing performance and usability.
- Integrated frontend with backend APIs and contributed to version control using **Git and GitHub**, reducing bug reports by **30%**.

Education

Master of Computer Applications (M.C.A.)

2024 – 2026

Vellore Institute of Technology (VIT) Bhopal

CGPA: 8.2 / 10

Bachelor of Computer Applications (B.C.A.)

2021 – 2024

Dr. B.C. Roy Engineering College, Durgapur (MAKAUT University)

CGPA: 8.4 / 10

Awards & Certifications

- Completed **Internship at Indian Oil Corporation Limited (IOCL)** under the System Information Department, gaining hands-on experience in frontend development and enterprise-scale projects.
- **LeetCode Achievements:** Solved **600+ problems**, earned **27+ badges**, and achieved a contest rating of **1533**, demonstrating strong problem-solving skills.
- Recognized for consistent performance in academics with a CGPA of **8.4 (B.C.A.)** and **8.2 (M.C.A.)**.
